805
∞ Infinity
IN WIN

Gaze Into the Abyss

The 805 Infinity's front panel possesses an LED lighting effect using an LED strip and a mirror.
The reflection is an illusion that displays endless rows of LED lights fading into the darkness;
this effect is referred to as the "Infinity Mirror."
The 805 Infinity provides users with a unique, luminous visual experience.

AURA READY

The 805 Infinity is most compatible with the onboard 4-pin RGB header(s) found on many ASUS/ROG motherboards. The AURA software will be able to control the 805 Infinity lighting effect.

HALO Option

If you own a different motherboard, you are still able to adjust the lighting effects by downloading the In Win software driver "HALO" from our 805 Infinity webpage.

ROG Certified

The 805 Infinity received the prestigious ROG certification. Users are guaranteed to have a quality product, that has the design consistency and reliability of an ROG certified product.
