WINBOT's Elevated Engineering

WINBOT's bold and striking round shape requires a 120-degree C environment, in order to mold the plexiglass to its iconic spherical shape. In order to achieve the desired translucent effect, dedicated staff must control the temperature, pressure and precisely manage time under harsh conditions.

Intelligence Beyond Imagination!

WINBOT boasts a built-in, advanced facial detection camera. Also, by using some specified hand gestures, WINBOT can operate and adjust to certain commands. Bringing science and technology to a fresh new approach.

Ultra-rare Limited Edition

The In Win R & D staff organized and crafted WINBOT to a specific standard so that meets the requirements of a certain height, structure and detailing. But because of such a labor intensive/detailed oriented project, WINBOT is also reduced to an ultra-rare limited edition production. Each one will be engraved with an individual limited edition serial number to enhance the collection value.
