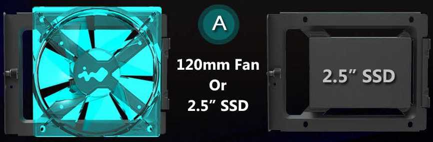
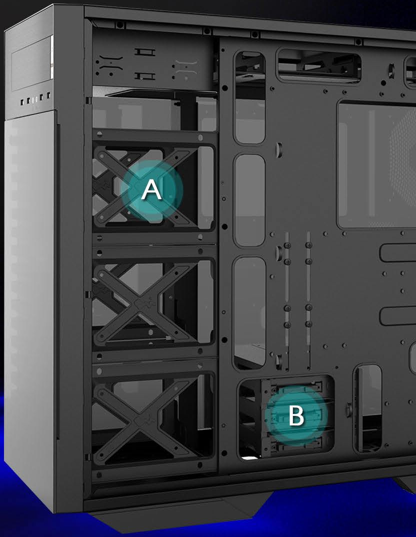
Dynamic Visual Effects

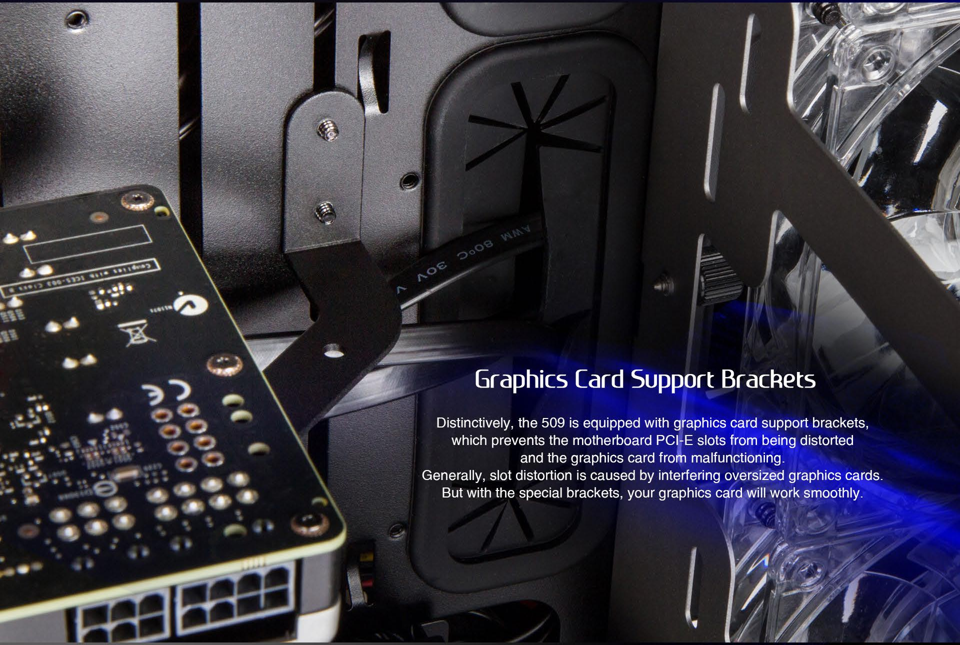
Consistent with In Win's distinguishable feature of previous chassis, the 509's front and side panel are both composed of tempered glass.
Which even comes with a RGB logo that's powered by a 4-pin connector (compatible with motherboards with RGB headers). These provides users with incredible visual experience

Multifunctional Bracket Design

There are three multifunctional brackets placed on the right side of the 509, near the front, which are not only supportive for 2.5" SSDs, but also accommodating of 120mm fans.
The versatile bracket design will make your PC building experience easy and enjoyable.





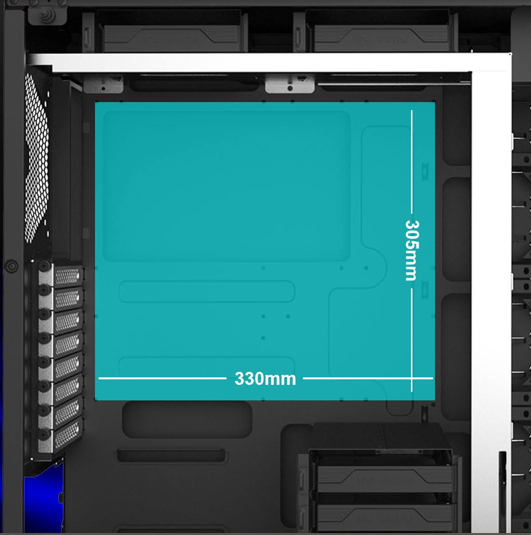


Graphics Card Support Brackets

Distinctively, the 509 is equipped with graphics card support brackets, which prevents the motherboard PCI-E slots from being distorted and the graphics card from malfunctioning.
Generally, slot distortion is caused by interfering oversized graphics cards.
But with the special brackets, your graphics card will work smoothly.

Supports up to an E-ATX Motherboard

The 509 full tower chassis's roomy interior supports : E-ATX, ATX, Micro-ATX and Mini-ITX motherboards. These motherboard options allow gamers to have more options when choosing their gaming hardware.



Versatile Liquid Cooling Placements

In terms of the cooling installation, the 509's interior structure is extremely flexible. The front side supports a maximum of three 120mm fans, and a 360mm radiator simultaneously. Moreover, the side and the middle of the chassis also supports 360mm radiators and fans.

Outstanding Cooling Performance

The unique design of the hexagonal, honeycomb mesh exhausts the generated heat from the chassis, optimizing excellent cooling performance.
